HOME CLEANING

Launch Status Report

Your complete business launch package — what's built, what's left, and where to go next.

 **LIVE & ACCEPTING LEADS**

1

What's Been Built

COMPLETE

Your full digital storefront and business toolkit — live and verified.

WEBSITE (LIVE & BILINGUAL EN/ES)

- ✓ **Landing page** — hero, services, how-it-works, gallery, service areas, quote form
- ✓ **Instant price calculator** — live estimates from one shared pricing file
- ✓ **16 local SEO pages** — house & move-out cleaning for all 8 valley cities
- ✓ **Sitemap, robots.txt, structured data, social-share previews**

PRICING & CUSTOMER COMMS

- ✓ **One pricing config** — Standard \$120 / Deep \$220 / Move-out \$280; your wife can edit rates in one place
- ✓ **Quote engine** — quote, confirmation, reminder & review messages in SMS + email, EN + ES
- ✓ **Quote form → your Gmail** — live via Formspre, tested & confirmed

CLIENT DOCUMENTS (PRINTABLE)

- ✓ **Service agreement (EN + ES), new-client intake form, room-by-room checklists**
(standard/deep/move-out)

MARKETING KIT

- ✓ **Google Business Profile kit** — description, services, 5 posts, 10 review requests
- ✓ **30-day GoHighLevel follow-up sequence** — 5 workflows, bilingual, paste-ready
- ✓ **Social media starter kit, verification video script, photo shot-list, first-week ops checklist**

BRAND & PRINT

- ✓ **Logo system** (4 lockups) + **brand green** unified across site & print
- ✓ **Business card** (print-ready front/back PDFs) + **flyer & door hanger** with tear-off tabs

OWNER DASHBOARD

- ✓ **Office dashboard** — jobs, clients, calendar, invoices; PIN-protected, reached via footer "Owner login"

These require your accounts, decisions, or real-world credentials — I can't do them for you, but everything's prepped so each is quick.

LAUNCH-CRITICAL

- ☐ **Verify your Google Business Profile** — started; ~5-day video verification. Everything to paste is in your GBP kit.
- ☐ **Send me your Google review link** — once verified, so I can wire it into your review texts/emails (the one open config item)
- ☐ **Get licensed & insured** — then I'll drop the "*placeholder" badge and fill the insurance blank in your agreement

BEFORE SERIOUS VOLUME

- ☐ **Have a lawyer review the service agreement** — it's a solid draft, flagged for review before use
- ☐ **Replace placeholder photos** — swap in real before/after from your first jobs (shot-list ready)
- ☐ **Add real Google reviews** — ask every early customer; aim for 5+ to start pulling in strangers

GROWTH (WHEN READY)

- ☐ **Buy a domain** — e.g. clearspaceutah.com, nicer than the github.io URL
- ☐ **Set up GoHighLevel** — build the 5 workflows from your sequence file; automates follow-up
- ☐ **Synced backend** — so your phone & desktop share dashboard data (also enables the phone-app version)

Bottom line: your site, pricing, lead pipeline, branding, and print assets are 100% done and live. The only thing gating a "fully finished" setup is your **Google review link**, which depends on GBP verification. Everything else above is growth, not blockers.

3 What to Work On Next

A prioritized roadmap — do these roughly in order for the fastest path to steady bookings.

1 Land your first 3–5 jobs — even at a discount

Print the flyer & door hangers and canvass your own West Jordan neighborhood. Offer a small "grand opening" rate in exchange for a Google review and permission to photograph.

Why first: reviews + real photos are the fuel everything else needs. Nothing converts strangers like proof.

2 Finish Google Business Profile & get to 5 reviews

Complete verification, upload 10+ real photos, publish your first post, and ask every early customer for a review. Send me the review link so one-tap review requests go live.

Why: GBP is how people searching "house cleaning near me" in the valley actually find you.

3 Replace placeholder photos with your real work

Shoot before/after on every job (shot-list is ready). Swap them onto the site — send them to me and I'll drop them in.

Why: authentic photos of your results out-convert stock every time.

4 Get consistent on social & Nextdoor

Post 1–2×/week using your social kit — mostly before/after. Claim a Nextdoor business page; it's gold for suburban cleaning referrals.

Why: free, local, and compounds. Consistency beats perfection.

5 Automate follow-up with GoHighLevel

Once lead volume grows past what you can text by hand, build the 5 workflows from your 30-day sequence so no lead goes cold.

Why: most jobs are won on the 2nd–5th touch, not the first.

6 Buy a domain & consider a synced backend

A real domain lifts trust on cards and ads. Later, a shared database lets your phone & desktop see the same dashboard and powers a true phone app.

Why: polish and scale — valuable, but only once jobs are flowing.

4

Quick Reference

Everything you need at a glance.

YOUR LINKS

Public site	.../ClearSpace/
